**PORTFOLIO MANAGEMENT**

Kevin Simpson and Josh Smith, CFA  
Capital Wealth Planning, LLC (CWP)

As of 3/31/26

**REASONS TO INVEST**

- Two Potential Income Streams:** DIVO seeks income from dividend paying stocks and by opportunistically writing covered calls on those stocks.
- Professionally Managed:** Access a professionally managed dividend and option income investment strategy through the efficiency of an ETF.
- Seeks to Lower Volatility:** Dividend and option income may provide lower share price volatility versus the overall market during times of broad-based market declines.

**TOP 10 HOLDINGS**

TICKER	COMPANY	% WT.	TICKER	COMPANY	% WT.

Fund inception date: 12/13/2016. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. For most recent month end performance, visit AmplifyETFs.com/DIVO. Brokerage commissions will reduce returns. NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The closing price is the last price at which the fund traded. Indexes are unmanaged and it's not possible to invest directly in an index. The S&P 500 Total Return Index is a market-cap-weighted index of the 500 largest U.S. publicly traded companies.

- Health Care (9.54%)
- Energy (8.72%)
- Consumer Staples (6.50%)
- Materials (3.10%)
- Utilities (2.31%)
- Communication Services (1.21%)

## ACTIVE MANAGEMENT SELECTION PROCESS

*There is no guarantee that distributions will be made.*

**Carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund's statutory and summary prospectuses, which may be obtained at [AmplifyETFs.com](http://AmplifyETFs.com). Read the prospectus carefully before investing.**

Investing involves risk, including the possible loss of principal. You could lose money by investing in the Fund. There can be no assurance that the Fund's investment objectives will be achieved. **Covered call risk** is the risk that the Fund will forgo, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call, but has retained the risk of loss should the price of the underlying security decline. **Smaller Companies Risk.** Small and/or mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies. **Non-Diversification Risk.** Because the Fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Amplify CWP Enhanced Dividend Income ETF (DIVO) received 5 stars among 82 funds in the Derivative Income category for the overall, 4 stars among 82 funds for the 3-year, and 5 stars among 66 funds for the 5-year periods ending 3/31/26.

Amplify Investments LLC serves as the investment adviser to the Fund. Capital Wealth Planning, LLC and Penserra Capital Management LLC each serve as investment sub-advisers to the Fund. Amplify ETFs are distributed by Foreside Fund Services, LLC.

<sup>1</sup>OTM (out of the money) call options seek to balance growth potential with income generation. ATM (at the money) call options prioritize income from option premiums with potential growth if the underlying isn't called away.
